

I think that the DO NOT CALL legislation should be passed, I am sick and tired of being bothered at home by telemarketing calls. I do not feel that any person or business should be able to call my home to try and sell/market any products. I will not speak to anyone that calls anyway, I pick up the phone and hang it back up but it is still very aggravating that these people can call and disturb me anyday of the week including Sunday morning! I have even thought about getting rid of my home telephone if it does not stop soon.
